

Oral & Nasal Suction Devices

Bebeonkers® & Webeonkers®

Bebeonkers® were designed to facilitate quick removal of secretions both nasally and orally for safe oral care without hurting baby. These devices are made from a soft material and a patented multi-hole distal end that does not grab tissue like similar single hole suction tips and effectively remove the most tenacious secretions.

The **Bebe Keeper Kover®** is an effective way to keep the **Bebeonkers®** clean so that the suction devices can be used for up to 12 hours or per the hospital standards. Both the **Bebeonkers®** and **Bebe Keeper Kover®** are a disposable and safe solution for preemie care.

Bebeonkers I®

(Bulbed Tip)

Bebeonkers II® & Webeonkers®

(Standard Tip)

Bebe Keeper Kover®
