

Nozin®

NASAL SANITIZER®

NOZASEPTIN® FORMULA ADVANCED ANTISEPTIC

SURGERY RELATED PROTOCOL GUIDELINES

We understand that while every facility is different, it can be helpful to have standard protocols as a starting point. For this purpose, the use protocol for Nozin® Nasal Sanitizer® antiseptic is presented below. For additional protocols, or to answer questions on the protocol below, please contact your local Nozin representative or contact us.

PERIOPERATIVE NOZIN 360™ PROTOCOL

User	Recommended Protocol
Patient	▶ 3 Nozin® applications 1 hour prior to surgery
Patient	▶ Post-op: 3 Nozin® applications per day inpatient and outpatient
OR Staff	▶ 2 Nozin® applications per 12 hour shift, Include all with patient contact
Visitors	▶ 1 Nozin® application before entering patient room, then every 8 hrs
Caregivers	▶ 2 Nozin® applications per day

Continue the other components of your pre-op protocols. Nozin® Nasal Sanitizer® is for nasal decolonization only. Use as directed.

For additional protocols for your facility, please call your local Nozin representative or contact us.
